Modul-System in Holland at a TV broadcast

Premiere for Modul-System on national TV!

Modul-System has been highlighted in a TV broadcast production from the Dutch Automotive program RTL Transportwereld.

The program did run in May in the Neatherlands and did present both Modul-System as well as the Modul-System cooperation with Cofley, one of Europes largest Utility companies.

Markus Bergström at Modul-System.

The Profile

Markus Bergström

Production leader and assisting Factory Manager

Age: 31

Years at Modul-System: 13

Hobbies: Hunting, fishing

What is included in your responsibilities?

I am responsible for production and planning for the Blue Collar personel. In my assignments it is included to plan the resources and capacity for the Modul-System production.

- Togheter with the two earlier points mentioned we always work with improving our processes and production flows in the factory to increase our efficiency.

What actions are done right now in the factory to meet the increase in request of products?

- We have increased the resources on all our stations in the factory as well as added shifts to our painting and fitting stations.
- The Production will be open and up and running all summer and not close this year.

What are the plans for the autumn?

We will invest in increased atomization of the complete fitting- and packaging departments. In parallel we will also complete our ISO 14000 environmental certification. These are changes that will make Modul-System better as a company and also in the end lead to a improved level of service for our customers.
