Modul-Connect
QUICK START GUIDE

This light commercial vehicle is fitted with Modul-Connect from Modul-System.

Modul-Connect is an innovative wiring and control system, which enables you to control the vehicle's auxiliary electrical items.

This product will offer you reliable service by simplifying the electrical installation in your service vehicle.

Please follow this 'Quick start guide' to obtain operation of the vehicle.

Full operational instructions and installation instructions can be downloaded from www.modul-system.com

DOWNLOAD THE MODUL-CONNECT APP

The application is available on AppStore and Google Play.

Follow the instructions in the App to get started.

CONNECT TO THE MODUL-CONNECT SYSTEM

Scan the Data Matrix Code to connect to the vehicle. The code can be found on the reverse side of the driver's sun visor. If the primary "sun visor" label is missing, a spare label can be found on the inside cover of main box.

If the phone camera is not working properly, it is possible to manually select the box and connect to it using the 6 digit pin code available on the label.

In the app: *Settings – Connect – Connect to vehicle – List devices in range*

ADDITIONAL SWITCHING DEVICES

If switch panels are installed, these can also be used to manage the electrical accessories connected to the system.

The switch panels and phone app can be used together. The Bluetooth module allows for up to 8 simultaneous connections.
